

**Proper &
Effective
Masonry
Construction**

Meet and Greet

May 10th 5:30 PM

Builders Exchange of Kentucky, Inc.

Educational Suite

2300 Meadow Dr., Louisville, KY 40218

Presenter: David Collins, CSI, this presentation delves into the aspects of proper and effective masonry construction. Collins will give an overview of proper installation, tolerances, and quality assurance needed for successful projects, which will include information on grouting and reinforcement certifications and flashing certifications to ensure quality installations.

Objectives:

- Give the designer a better understanding of the competency level of the contractor being employed
- Give the designer an understanding that he/she must give clear and concise instructions on what he/she is requesting
- Help the designer understand the tolerances of materials being installed
- Show the designer why lifelong learning is necessary to have for successful projects

Workmanship: 1 hour – 2 AIA/CES LU credits
